

OPERATORS MANUAL AND PARTS LIST

MANUFACTURED AND SOLD BY:

"pick up with us"

We have spent a lot of time and money to design our products to the highest quality standards... yours!

In order to continue to meet your expectations, we invite your comments.

Thank you for helping us to do the best for you.

Watch for this symbol. It identifies potential hazards to health or personal safety. It points out safety precautions. It means: ATTENTION - Be Alert. Your Safety is involved.

OPERATING SAFETY

- 1. Operate pickup smoothly avoiding sharp or sudden turns, start and stops.
- 2. Watch where you are going, especially near ditch slopes and around obstacles such as trees, poles and towers.
- 3. Stay clear of machine when operating, raising, or lowering pickup.
- 4. Do not use pickup for any other purpose than what it is designed for.

TRANSPORT SAFETY

- 1. When transporting, always lift pickup as high as possible.
- 2. Turn or maneuver combine slowly being aware of pickup width.
- 3. Drive slowly over train tracks and rough terrain.

MAINTENANCE SAFETY

- 1. Never adjust or lubricate machine while it is moving or running.
- 2. Always use proper tools required for job.
- 3. Escaping hydraulic oil under pressure can penetrate the skin causing serious injury. See a doctor immediately if injured. Ensure all connections are tight and all hoses are undamaged. Before disconnecting any hydraulic lines relieve all pressure in system.
- 4. Wear gloves and goggles and use a piece of cardboard or wood as a backstop against spurting fluid when searching for hydraulic leaks.
- 5. Always maintain tire pressure at 10 PSI Never stand over tire while inflating.

ASSEMBLY SAFETY

- 1. Prepare a clear work area large enough to accommodate the pickup size.
- 2. At least two people should be available for assembly, especially when lifting or aligning heavy components.

AWARNING

ROTATING PARTS HAZARD

- 1. KEEP ALL SHIELDS IN PLACE WHEN OPERATING.
- 2. STOP TRACTOR ENGINE, PLACE ALL CONTROLS IN NEUTRAL, SET PARK BRAKE, REMOVE IGNITION KEY, AND WAIT FOR ALL MOVING PARTS TO STOP BEFORE SERVICING, ADJUSTING, MAINTAINING OR UNPLUGGING.
- 3. KEEP HANDS, FEET, HAIR, AND CLOTHING AWAY FROM MOVING PARTS.

FAILURE TO FOLLOW THESE INSTRUCTIONS WILL RESULT IN SERIOUS INJURY OR DEATH.

403520

SAFETY DECALS

- 1. Keep decals clean. Remove all dirt with wet cloth when necessary.
- 2. Replace safety decals if destroyed, missing, painted over, or unreadable.
- 3. If a part or section of the pickup is replaced that carries a safety decal, apply a new decal immediately.
- 4. New safety decals are available from your Victory dealer.

WARRANTY

POLICY

Wheatheart Manufacturing will warrant each new Victory Pick Up to be free from factory defects in material and workmanship under normal use and service when set up and operated in accordance with factory instructions.

The Warranty will apply under the following conditions.

CONDITIONS

Wheatheart Manufacturing has received the Warranty Registration.

The Warranty will be limited to two years normal use.

The Warranty is limited to the supplying of replacement parts in exchange for parts defective due to material or factory workmanship.

In cases where dealer personnel must be involved, a reasonable labor allowance will be allowed.

The Warranty is void on any unit that has been tampered with or has been subject to misuse, negligence or accident.

The Warranty on belts is void if the failure is due to uneven roller tension, excess belt tension, or weed wrapping on the rollers.

In case of belt failure the Warranty will be limited to belt replacement only under the following conditions:

- A. Apron belts (plain); belt replacement only.
- B. Draper belts (with tines) replacement belt only, the user will be responsible for exchange of tines.

PROCEDURE

Customer will have to bring the defective part to the dealer. Dealer will replace from his stock. Dealer shall hold defective parts until disposal authorization is received.

Dealer must complete Warranty claim in full including serial number and date of sale and forward to Wheatheart Manufacturing.

OPERATING YOUR PICKUP

- 1. Before operating the pickup, be sure that all nuts are tight, all safety shields are in place and belts not over tight.
- 2. Do not over tighten your belts, it will not improve performance, it will only cause more maintenance.
- 3. Operate the pickup at slow speeds to assure that all parts operate freely.
- 4. The Super Series pickups are a unit body design, which hinge on the combine platform. In order to accommodate various crop conditions, the drive roller position is adjustable.

The tines should be at right angles to the ground for best results as in the illustration below. The distance of the tines to the ground surface can be adjusted by adjusting the wheel arm spacers.

Fig. 1

Under normal conditions the pickup should operate with the header approximately twelve inches off the ground.

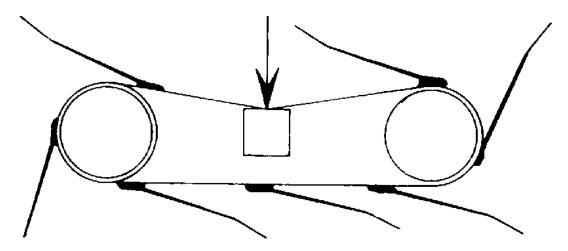

Make sure that the castor wheels and uprights are well greased prior to use.

The windguard can be adjusted for varying conditions. In heavy canola swath the unit can be moved up so as not to interfere with the swath coming in. We do not recommend operating the pickup without the wind guard.

SPEED: The belt surface speed should approximate the ground speed. To achieve this the drive shaft RPM should be fifty times ground speed in miles per hour. For example at four miles per hour the drive shaft should be operating at two hundred RPM.

CAUTION: After three to four hours operation the tines should be checked. Some may require tightening.

For adverse swath conditions optional double (Spyder) tines are available.

PICKUP PARTS LIST FOR SUPER 7 AND 8 BELT PICKUP PLEASE CONSULT YOUR DIAGRAM TO DETERMINE PART NUMBER REQUIRED

	Part #	Description	39	700501	Drive Roller 4-1/2" 8 belt	111	324007	Seal kit/Hyd motor
